RYAN WHITE WORKS!

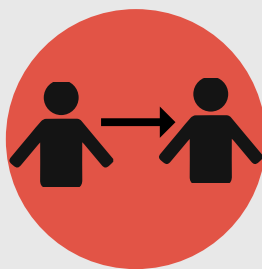

Ryan White services keep HIV-positive individuals in treatment and care

With treatment, people with HIV can live active, healthy lives.

People whose virus is suppressed for 6 months cannot transmit HIV through sex.

But, if disconnected from care, resistance to medications can develop making it easier to transmit HIV. Moreover, without treatment HIV is deadly.⁵

RYAN WHITE PROVIDES SERVICES ACROSS THE HIV CARE CONTINUUM

HIV CARE CONTINUUM:

THE SERIES OF STEPS A PERSON WITH HIV TAKES FROM INITIAL DIAGNOSIS THROUGH THEIR SUCCESSFUL TREATMENT WITH HIV MEDICATION

While only **60%** of people nationwide have a viral load that is effectively suppressed as of 2015,⁶

85.9%

of HIV-positive clients who had received at least one Ryan White funded medical care visit have achieved viral suppression.⁷

WITHOUT MEDICAID EXPANSION, ALABAMA RELIES ON RYAN WHITE MORE THAN OTHER STATES.

1374 Ryan White program clients with HIV in Alabama were uninsured in 2015.⁸

No other program provides the same set of gap-filling services or care as Ryan White. Even after health reform, **Ryan White remains crucial for Alabama.**
